FEEDBACK GUIDE — WHAT TO REVIEW

Your Review Checklist

Go through each point and note your changes before sharing with a web developer.

01

Company Name

The mockup uses "StoneCraft Surfaces" as a placeholder. Replace with your actual business name. Also decide if you want it in English, Kannada, or both.

ACTION REQUIRED

02

Hero Headline

"Where Stone Meets Elegance" is a suggestion. You can change this to something that reflects your USP — like pricing, speed of delivery, or variety.

OPTIONAL CHANGE

03

Product Photos

The grey placeholders on material cards need to be replaced with real photos of your quartz slabs, ACP sheets, and solid surface samples. The better the photos, the more premium the website looks.

CRITICAL — AFFECTS CONVERSIONS

04

Colour Theme

Current theme is dark background with gold accents — chosen for premium feel. If you prefer a lighter/white version or a different accent colour (like blue or green), that can be changed.

DESIGN CHOICE

05

WhatsApp Number & Location

Add your actual WhatsApp business number and showroom address in Bangalore. This goes in the CTA section and footer.

ACTION REQUIRED

06

Statistics (500+ Projects etc.)

Replace the hero statistics with your real numbers — years in business, number of projects, cities served, etc. Real numbers build more trust than generic placeholders.

ACTION REQUIRED

07

Pages Not Shown in This Mockup

This mockup shows the Homepage only. Additional pages you may want: individual Product pages (Quartz / ACP / Solid Surface), a Gallery/Projects page, and a Contact page with Google Maps embed.
